

Drawing Amendments:

None

Claim Amendments:

Claim 1 (currently amended): A warning device for affixation to the top of a shoe comprising:

an electronically activated controller affixed to the top of a shoe;

activation means for activating the controller; and

alarm means generated when the controller is activated.

Claim 2 (currently amended): A warning device for affixation to the top of a shoe;

an electronically activated controller remaining affixed to the top of a shoe;

a hands-free pressure-based activation means for activating the controller

when depressed by the other foot of the wearer; and

an alarm means for generating a distress signal.

Claim 3 (currently amended): A warning device for affixation to the inside tongue of a shoe;

an electronically activated controller remaining affixed to the inside tongue of a shoe;

a hands-free accelerometer-based activation means for activating the controller upon violent kicking by the wearer; and

an alarm means for generating a distress signal upon the activation of the activation means.
